PROJECTS

Study Share ⬀ | MongoDB, Multer, JWT, Node.js, React**,** Tailwind   **Mar 2025 – Jun 2025**

- Developed a secure MERN stack notes-sharing platform with JWT authentication for user registration, login, and logout.
- Implemented file upload functionality, allowing users to share study materials in various formats (PDF, DOCX, images, etc.).
- Enabled social media integration for seamless sharing of notes across multiple platforms.
- Provided full CRUD operations, allowing users to create, edit, and delete their shared content efficiently.

ShopEZ ⬀ | MongoDB, Express.js, React.js, Node.js, Redux Toolkit   **Aug 2024 – Nov 2024**

- Developed a complete full-stack e-commerce application using the MERN stack (MongoDB, Express.js, React.js), enabling dynamic interaction between frontend and backend with RESTful APIs.
- Implemented secure user authentication and role-based authorization using JSON Web Tokens (JWT), allowing seamless access control for both customers and administrators.
- Built intuitive features such as product browsing, category-based filtering, cart management, order placement, and customer reviews to enhance the shopping experience. Designed an admin dashboard for managing products, orders, and users.
- Utilized MongoDB for efficient data handling, improving application performance and scalability.

Kaarya ⬀ | Frontend Project   **Apr 2024 – May 2024**

- Developed a lightweight, responsive task management app using HTML5, CSS3, and JavaScript.
- Implemented priority-based task creation, status updates, and local-based task isolation per user.
- Added real-time task filtering by status (All, Completed, Pending) for better task tracking.
- Deployed the application on Netlify for public access and seamless performance.
